

# Critical Remote Monitoring and Endpoint Management

Mitigate the risk of cyber threats and proactively solve concerns before they become problems

#1

**3.3B** 

10M

Voted #1 Most Reliable
Access Tool for SMBs

Powers over **3.3 Billion** remote sessions and counting

Over **10 Million** endpoints under management

## Why Choose LogMeIn Central?

#### **Complete Security for your Endpoint Infrastructure**

Gain complete visibility and peace of mind while mitigating the risk of cyber threats with robust Security, Automation, and Monitoring functionality.

#### **Time and Cost Savings**

Manage and troubleshoot computers remotely to eliminate desk / onsite visits, manual installs, and waiting for computers to be unmanned.

#### **Increased Productivity**

Take back your time by automating routine IT tasks to simplify every facet of your business.

#### **Best-in-Class Unattended Remote Access**

Remotely manage all of your computers securely and troubleshoot issues without interrupting end users from one location – yours.

#### Simple to Use

Our intuitive interface ensures your team is up-and-running quickly so time to value is immediate.

Transform your business with the flexibility and freedom to pay for only what you need with LogMeln Central's focused functionality modules.

START WITH THE BASE

### Base

#### Fast, Secure HD Remote Access

Includes a web-based console with one click access to any computer, access from both desktop and mobile apps, ability to organize groups of computers, manage users, and more.

then

#### ADD CUSTOM MODULES

#### Security

#### Take Control and Mitigate Risk of Cyber Threats

Keep your endpoint infrastructure secure with critical patch management, application updates, and LogMeln Antivirus powered by Bitdefender.

# Automation

# Bring Business Productivity to the Next Level

Automate routine IT tasks to increase productivity and optimize resource allocation through One2Many, advanced scripting, proactive alerts, and more.

#### Insight

# Gain Better Visibility

Keep a constant pulse on your endpoint infrastructure with asset management, proactive alerts, computer audit and inventory, and more.

#### What our customers are saying:

Whether you're a large corporation or a small company, Central can help you keep your most essential machines up and running. It lets us do everything we need to do in one place. It's a phenomenal product."

Bob Arena, Manager, Direct Sales Desktop Support, ARAMARK
