

# Portnox CLEAR

## Cloud Service

Next-Gen actionable visibility and access control management Security-as-a-Service that keeps your network safe

Portnox CLEAR is an advanced security solution that delivers continuous, off and on premises risk monitoring of all of your endpoints, bringing affordable, deployable, and manageable Network Access Management (NAM) to any sized company as a cloud service. The platform provides absolute visibility and control by granting access following device profiling – based on the device itself, the network, and the user's identity.

## Don't take Unnecessary Risks with the Health of Your Network

As a SaaS cloud-based solution that can be set up in minutes, Portnox CLEAR protects your network from vulnerabilities that result from Mobile, BYOD, IoT and the use of unauthorized devices. It gives you full insight into activities within the network and absolute control of access permissions. Portnox CLEAR provides a holistic approach to ensuring network security that includes:

- **Ease of Use:** With a pre set-up infrastructure, any complicated integration can be enabled with a click of a button. Even novice users can complete a deployment without previous knowledge or training.
- **Continuous Risk Monitoring:** Being a cloud solution allows CLEAR to monitor the risks and "health" of corporate and personal assets, all the time, anywhere. Whether on premise or in a coffee shop, CLEAR identifies if the user disabled the drive encryption or anti-malware or is not upholding to corporate policies.
- **Risk Adaptive Access over the VPN:** Portnox CLEAR enables access not only by user's strong identity and device risk score when accessing through the VPN. CLEAR also supports the option to enable two-factor authentication for VPN connections.

## FEATURES AND BENEFITS

Portnox CLEAR saves you time and money with real-time visibility and control of all devices connecting to your network, through a Security-as-a-Service platform that works for all businesses regardless of scale. The first software-only cloud-based NAM, Portnox CLEAR is rapidly deployed in any environment and gives you the anytime, anywhere knowledge you need to secure the network in the age of IoT.

- 100% actionable visibility
- Protects the network from vulnerabilities that result from Mobile, BYOD and IoT
- Ease of deployment, with a pre-set infrastructure that requires no prior training
- Cloud-based and fully scalable, requiring absolutely no hardware
- Cost-effective and affordable for businesses of all sizes
- Protection of all access layers, including wireless, VPN, wired, virtual and cloud
- Multi-factor authentication over the VPN based on user identity and device risk score
- Continuous risk monitoring that identifies rogue or risky endpoints
- Centralized security for all locations
- Automated wireless access management
- Cloud Radius

## Network Visibility and Access Management in the Cloud – Keeping Your Network Safe

Portnox CLEAR brings you all of the benefits of 802.1x without any of the headache. Delivered as a cloud service, Portnox CLEAR functions across all access layers and provides 100% coverage of your network.

At the core of Portnox CLEAR is AgentP, a device agent supporting Windows, MAC, IOS and Android devices that provides continuous device risk validation on or off premise and maintains real-time and continuous posture assessment of each device. Additional components of the platform include:

- CLEAR Radius: Cloud-based Radius server and authentication
- CLEAR AD Broker: Lightweight software to support AD authentication and access controls
- CLEAR Analytical Engine: Continuous awareness of device risk posture and alignment to policy
- CLEAR Guest Management: Add-on offering robust management and control of guest access

## Enjoy the CLEAR Difference

With Portnox CLEAR, your network is continuously monitored and secure. Portnox CLEAR saves you time and money with real-time visibility and control of all devices connecting to your network, through a Security-as-a-Service platform that works for all businesses, regardless of scale. The first software-only, cloud-based NAM, Portnox CLEAR is rapidly deployed in any environment and gives you the anytime, anywhere knowledge and tools you need to secure the network in the age of IoT. Portnox CLEAR allows you to:

- **See** – 100% actionable visibility (managed devices, BYOD or IoT) in real-time due to our agentless approach, centralization and infrastructure vendor agnostic.
- **Control** – access through segmentation of the network according to IoT device type or group
- **Automate** – actions and responses, reducing the time and cost associated with manual responses

### ABOUT US

Founded in 2007, Portnox helps secure connected organizations with its cutting-edge technology that allows CISOs to see, control, react, and manage the risks that networks face – for any user, any device, anywhere.
