

INTEGRATED CLOUD EMAIL AND BRAND PROTECTION PLATFORM

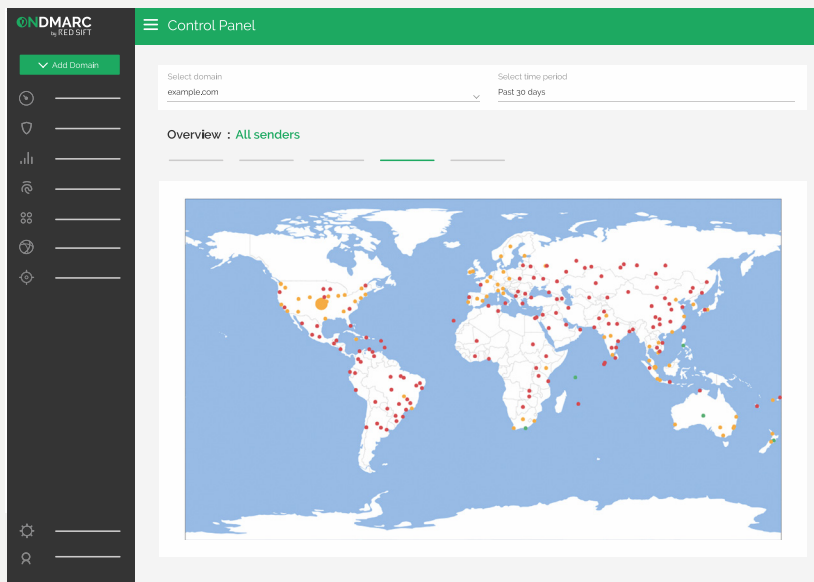

RED SIFT

OnDMARC and OnINBOX work together to deliver both inbound and outbound email protection. From blocking attacks that use email impersonation to trick recipients into opening them, to detecting and flagging inbound email threats for end-users.

OnDOMAIN rounds out the Red Sift platform by enabling users to proactively protect their domain perimeter and take down any lookalike domains, as well as monitor beyond the perimeter to inform users of issues that could become threats.

ONDMARC

Key benefits

- ✓ Minimize time to protection
- ✓ Uncover who is using your domain to send unauthorized emails
- ✓ Reduce configuration errors
- ✓ Block phishing attacks by shutting down spoofing and domain fraud
- ✓ Increase email deliverability rates for verified mail sources

Powerful features

Investigate

Verify your email security setup in seconds.

Threat Intelligence

Quickly surface and block bad senders.

Dynamic SPF

Easily and safely overcome the 10 lookup limit without introducing the instability of SPF flattening.

Sender Intelligence

Forensic reporting that delivers granular information on sending sources.

Dynamic DMARC

Manage DMARC, DKIM and SPF records from right inside the OnDMARC interface without needing to access your DNS.

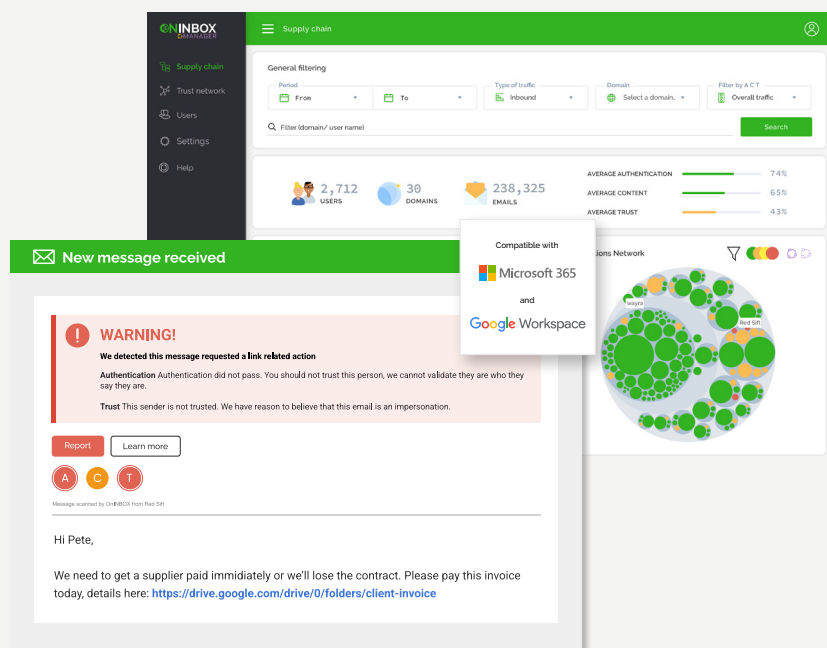

BIMI

Enhance your customers' and clients' brand experience with Brand Indicators for Message Identification (BIMI).

Schedule a meeting with one of our dedicated support team and secure your email today!

ARRANGE A DEMO

Protect employees with intelligent **inbound** email threat detection.

Key benefits

- ✓ Enable your users to spot otherwise impossible to recognize risks at a glance
- ✓ Move away from "train and blame" by empowering your users to confidently interact with email
- ✓ Flag risks to InfoSec teams that bypass your secure email gateway and reach the inbox
- ✓ Identify suppliers who are vulnerable to impersonation and take steps to help them get protected

Powerful features

Out-of-the-box automation

Rapid deployment for speedy email threat detection.

Threats visualized

In the header of every email, traffic light indicators alert users to the type and level of threats, across all clients, devices, and screens.

Deep supply chain insights

OnINBOX Manager allows InfoSec teams to identify who their organization is talking to and see what email security measures those connections have in place.

Customizable warnings

Add optional text-based banners based on configurable rules.

Advanced content scanning

Natural language processing understands the topic, intent, and level of urgency of the emails your staff receive and warns them of potential threats.

Remediation

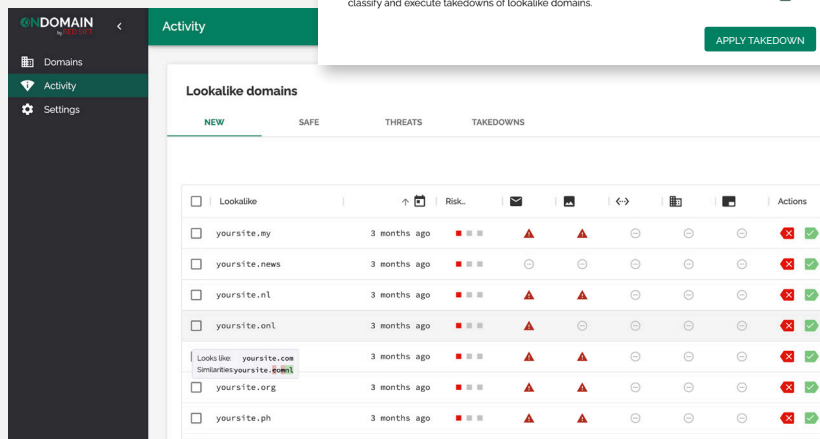

Investigate potential risks prioritized by threat level, then take actions such as marking emails as safe, as a threat, or by blocking and deleting them from employees' inboxes.

"Google filters out the malware, OnDMARC protects us from phishing, and OnINBOX is successful in highlighting otherwise impossible-to-spot BEC attacks."

Peter Shorney, Global Head of Information Security, Rentokil

Uncover and take down lookalike and impersonation domains
for enhanced **domain perimeter protection**

Key benefits

- ✓ See and prevent lookalike attacks
- ✓ Sort threats by their imminence and save time with event-driven alerts
- ✓ Discover and secure legitimate domains that have been forgotten about
- ✓ Defend your brand against abuse and reputational damage
- ✓ Shut down phishing sites using your brand before they're deployed in phishing campaigns to your customers, partners and suppliers

Powerful features

Domain and subdomain discovery

OnDOMAIN monitors 150 million newly registered domains and subdomains every day making it easy for you to define and visualize complex domain estates.

Machine-vision based logo detection

Using computer vision and machine learning, OnDOMAIN scans the web for both legitimate and illegitimate use of an organization's brand assets.

Takedown functionality

Integrated takedown functionality leverages existing relations with registrars and hosting providers to quickly effect domain takedown.

Interoperability with Red Sift platform

OnDOMAIN integrates with OnINBOX for automated supply-chain analysis and OnDMARC for a detailed view of your existing domains.

The platform advantage

Working in unison, our suite of products provides an integrated, end-to-end solution to close off different avenues of attack and help users manage their business email security and protect their brand reputation.

In & Outbound Protection with OnDMARC

- Protect all owned domains against impersonation
- DMARC reporting enhanced with threat feed intelligence
- Dynamically manage SPF, DKIM, DMARC

Protect your employees, partners & customers

Inbound Protection with OnINBOX

- The security analyst inside every email
- Protect users against the more advanced BEC attacks
- Identify suppliers who are vulnerable to impersonation

Protect your employees against supply chain attacks

Brand Perimeter Protection with OnDOMAIN

- Our *SpatialMatch* technology spots & stops brand abuse attacks in real time
- Discover, manage & audit the domains you own
- Remediation & take down of malicious domains

Protect your brand reputation against phishing attacks
